

CleverLCD Touch Dual

Touchscreen LCD for the Classroom

A range of large format interactive LCDs featuring crystal clear, pin sharp images, with optical touch technology for interaction. All of the CleverLCD Touch range feature dual touch control when used with Windows 7, single touch with Windows XP, Vista and Mac. Toughened glass protection is fitted as standard together with all steel bezel for added durability as required by schools for protection and heavy usage. Sizes range from 32" to 82" all in 16:9 widescreen aspect ratio and running at 1080p resolution (42" and above).

Exceptional Clarity

Crystal clear high resolution display – no longer do you have to teach children in subdued light, with the superb picture quality offered by the CleverLCD Touch *Dual*. Also the massive lamp life of 50,000 hours ensures you will never have to purchase an expensive lamp replacement again.

Simplicity and Accuracy

Easy to control with the precision optical technology. Both pupils and teachers can easily manipulate the display, with no body shadow distractions. If using Windows 7 then dual touch gestures are also supported.

PC Option

Optional built in PC for simple installation and operation, removing all need for cabling, other than the mains lead. Ideal for portable solutions to make any learning space instantly interactive.

Lynx Software

Lynx interactive whiteboard software is supplied with every CleverLCD Touch *Dual*. Intuitive to use with large icon display, comprehensive gallery of images and sounds and desktop overlay mode. Dual touch control as standard and can import Smart and Promethean files via the common file format.

Options & Accessories

Wide variety of installation options from wall mount at any height, electrical and mechanical wall lifts, mobile trolleys again with fixed and adjustable height options. One time calibration ensures quick set up with minimum of fuss.

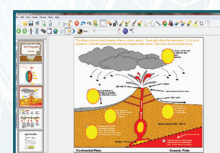

Dual Interactive
