Oceanspace™ HDP3500

Huawei Symantec Oceanspace™ HDP3500 is a multifunctional storage product integrating NAS and backup function. It is powerful and simple to manage, which can be widely used in business, government, education, health care and other industries.

Product Features

Powerful data sharing capability

- l Provide a comprehensive data sharing service for Windows, Linux, VMware platform and Microsoft Virtual Machine
- l Support NFS, CIFS, FTP, HTTP protocols
- l Support de-duplication to save storage space
- l Support Distributed File System(DFS) for easy centralized management of shared resources
- l Support remote data replication to implement remote disaster recovery
- l Support space quota management
- l Provide privilege management capability to avoid unauthorized access
- l Support snapshots, rapid data recovery

Comprehensive data protection

- l Integrate the widely used backup software: Symantec Backup Exec, thus can be easily upgraded to backup system
- l Provide comprehensive data protection for Windows, Linux platform, VMware and Microsoft virtual machines
- l Provide automatic data protection for desktop and laptop computers
- l Provide flexible backup strategy and rapid data recovery capability
- l Provide efficient restore mechanism for Windows and Linux users
- l Provide continuous data protection(CDP)

Flexible backup solution

- I With integration of backup software, backup server and storage device, HDP3500 can minimize the user deployment investment, and reduce the operation and maintenance cost for users.

Easy data storage

- I Support iSCSI protocol
- I Support multi-network interface binding function, enhance overall system performance

Simple management

- I Provide easy graphical management interface
- I Provide Log report, e-mail alert, remote management, simple operation and easy maintenance
- I Provide the operation wizard, to help routine management and maintenance

Product Specification

Product	HDP3500
Hardware Features	
System Architecture	Integration Architecture
CPU	1 *X86 4-core CPU (Expandable to 2)
Cache	4GB or 8GB (Optional)
Host Interface	2*1Gb GE (Expandable to 6*1Gb GE)、support 1*4Gb FC or 1* 3Gb SAS for tape archiving
Max hard disk number	24 SATA Hard Disk: 1TB / 2TB 7200 rpm
RAID Support	0、1、5、6
Data Sharing	
Protocol Type	Support NFSv2、v3、CIFS、FTP、HTTP
Advanced Features	Single Instance Storage(SIS), Distributed File System (DFS), Data Replication(DFS-R), Snapshot(Max 64 in single volume), Quotas, Privilege Management
Data Protection	
Computer Protection	Support Windows, Linux, Computer Data Protection, Support Windows OS rapid recovery
Support database application	Support the backup of SQL Server, Oracle, Exchange, Lotus Domino, DB2, SharePoint, Windows Active Directory and so on, support the CDP of file, SQL Server, Exchange in Windows platform
Data Storage	
Host interface	Support 2*1Gb iSCSI (Expandable to 6*1Gb iSCSI)
Compatibility	
OS Compatibility	Support Windows, Linux, Unix Platform, Support Microsoft Hyper-V, VMware
Management Features	
Management Interface	Graphical management interface
Management Features	Support log, mail alert, SNMP, Support Web remote management
Physical Features	
Power Supply	AC 200V~240V
Power Consume	< 550w
Dimension	175mm(H)*440mm(W)*685mm(D)
Weight	< 45kg (without hard disk)
