Tiny footprint energy efficient desktop computing.

The VeryPC Nano N5010e

Everyday computing in a really tiny chassis for where desktop space is extremely limited. The low cost CPU integrated platform makes a very affordable PC.

Truly tiny - save desktop space

The 25mm thin chassis can be sat down on the desk, stood up in the included stand or simply mounted to the back of any VESA compatible monitor.

Intel® Atom™ platform

The integrated Intel® Atom™ D2550 platform is what makes a PC this tiny possible. You can trust in the performance and reliability of Intel® processing, chipset and graphics to keep you working every day.

Integrated graphics

With the built in Intel® Graphics Media Accelerator 3650, high definition media and dual display via the HDMI and VGA video ports is possible.

Energy efficient

The Atom™ D2550 has a maximum power draw of just 10 watts. Based around this core, the extremely low energy requirements of the VeryPC Nano mean you'll keep the utility bills of your IT department as low as possible. You can also say goodbye to hot stuffy IT suites with the cool operation of the VeryPC Nano.

Features

- » Wireless b/g/n
