Database Installation

1. Open the zip file and locate the access database (LogonRecords.mdb)
2. Copy this file into the following location \\SERVERNAME\RMDelivery

The database has to be located in an 'RMDelivery' folder as this can be accessed via the machines even when no-one is logged on.

Preparing the logon/logoff files

1. Open the 'LogonRecorder_Logon.vbs' file in notepad
2. Browse to the line 'conn.Open "Provider=Microsoft.Jet.OLEDB.4.0; Data Source=\\SERVERNAME\RMDelivery\LogonRecords.mdb;"'
3. Replace the SERVERNAME, with the name of the server you have placed the database on
4. Repeat the above steps using the 'LogonRecorder_Logon.vbs' file

Logon/Logoff Script Installation

1. Logon to one of your server
2. Open 'Active Directory Users and Computers' (Start > Control Panel > Administrative Tools)
3. Right Click on the 'Establishments' folder
4. Select the 'Group Policy' tabs
5. Locate the 'Script Actions' GPO (usually located at the bottom of list)
6. Click on the 'Edit' button
7. Browse to 'User Configuration > Windows Settings > Scripts (Logon/Logoff)'
8. Double Click on the 'Logon' option
9. Click show files
10. Paste 'LogonRecorder_Logon.vbs' into the folder
11. Click the 'Add' button
12. Select the 'LogonRecorder_Logon.vbs'
13. Repeat steps 8-12 but select the logoff option and use the 'LogonRecorder_LogOff.vbs' file
