

Configuring proxy settings for Kindle Fire HD

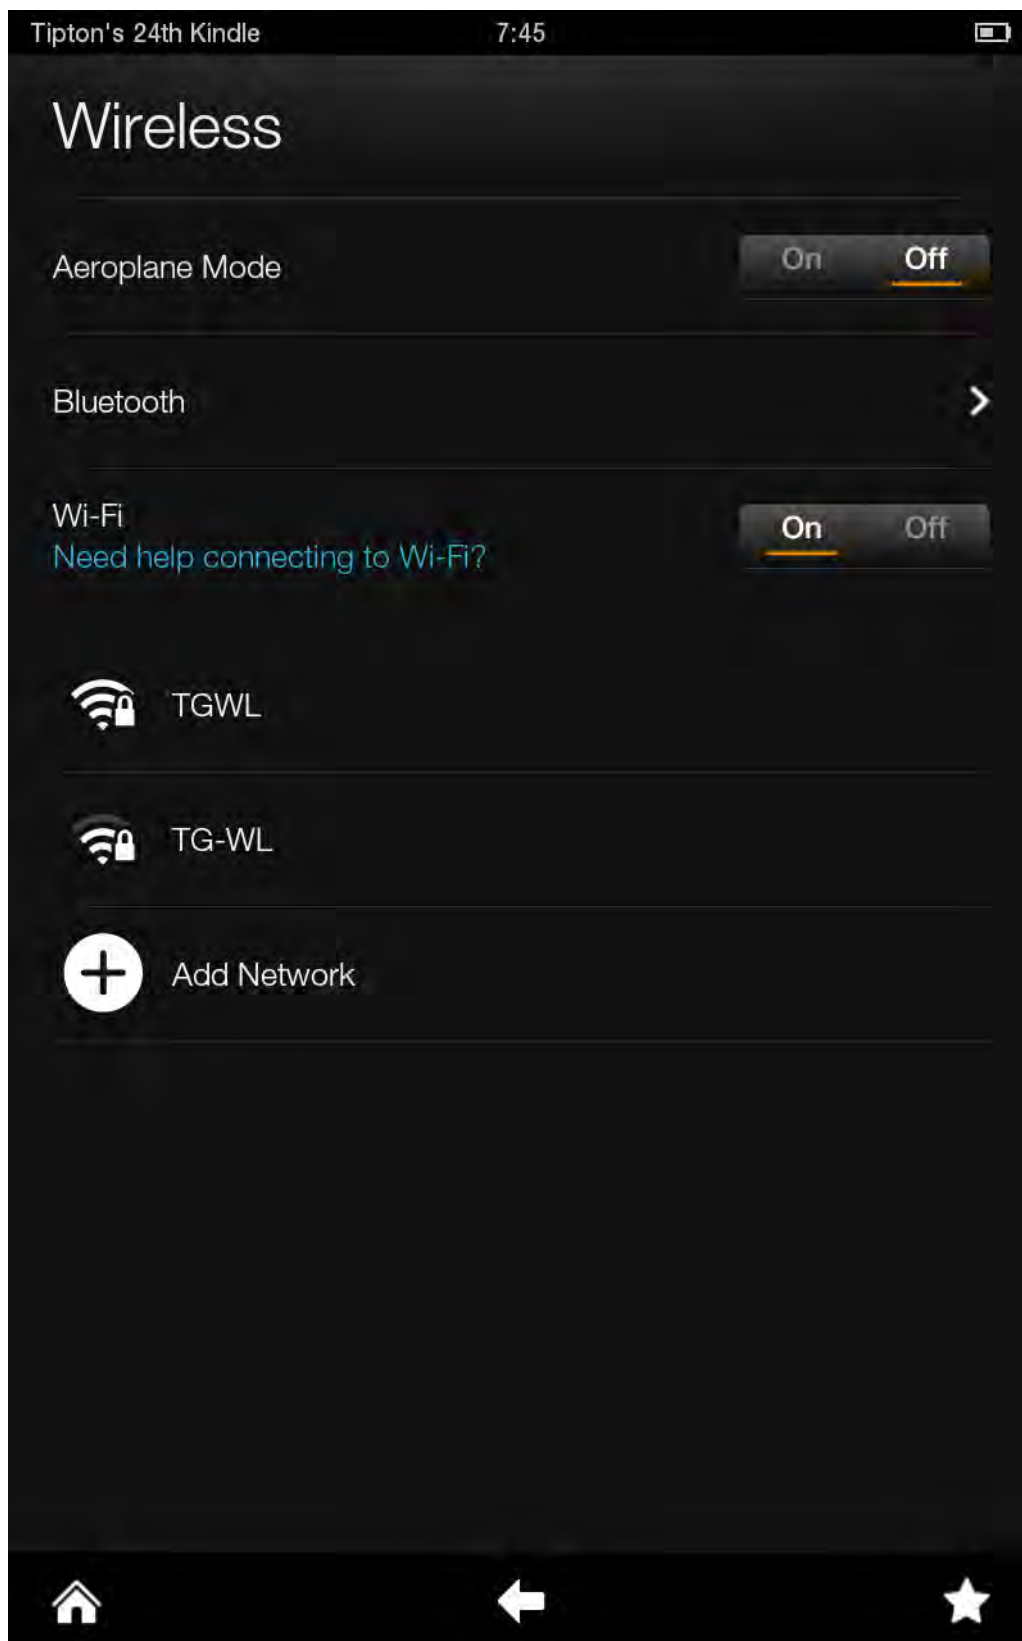

Initial screen for kindle fire HD looks something like this.

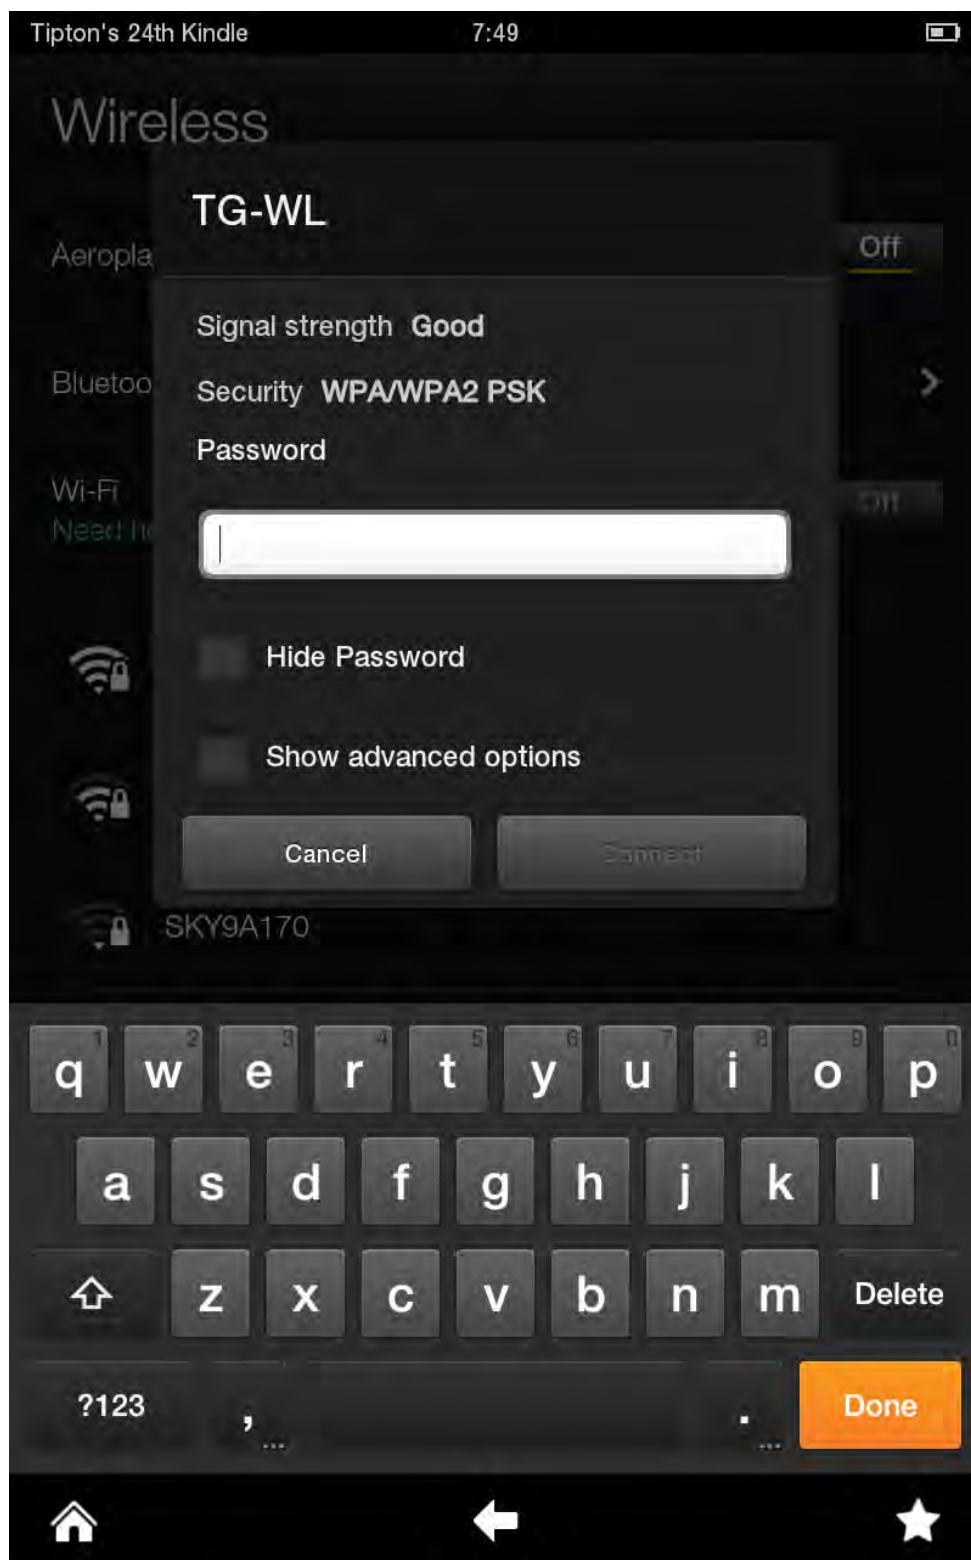

Place your finger at the top of the screen where it displays time. Drag your finger down. You will see the screen like below. You can see the Wireless Icon now.

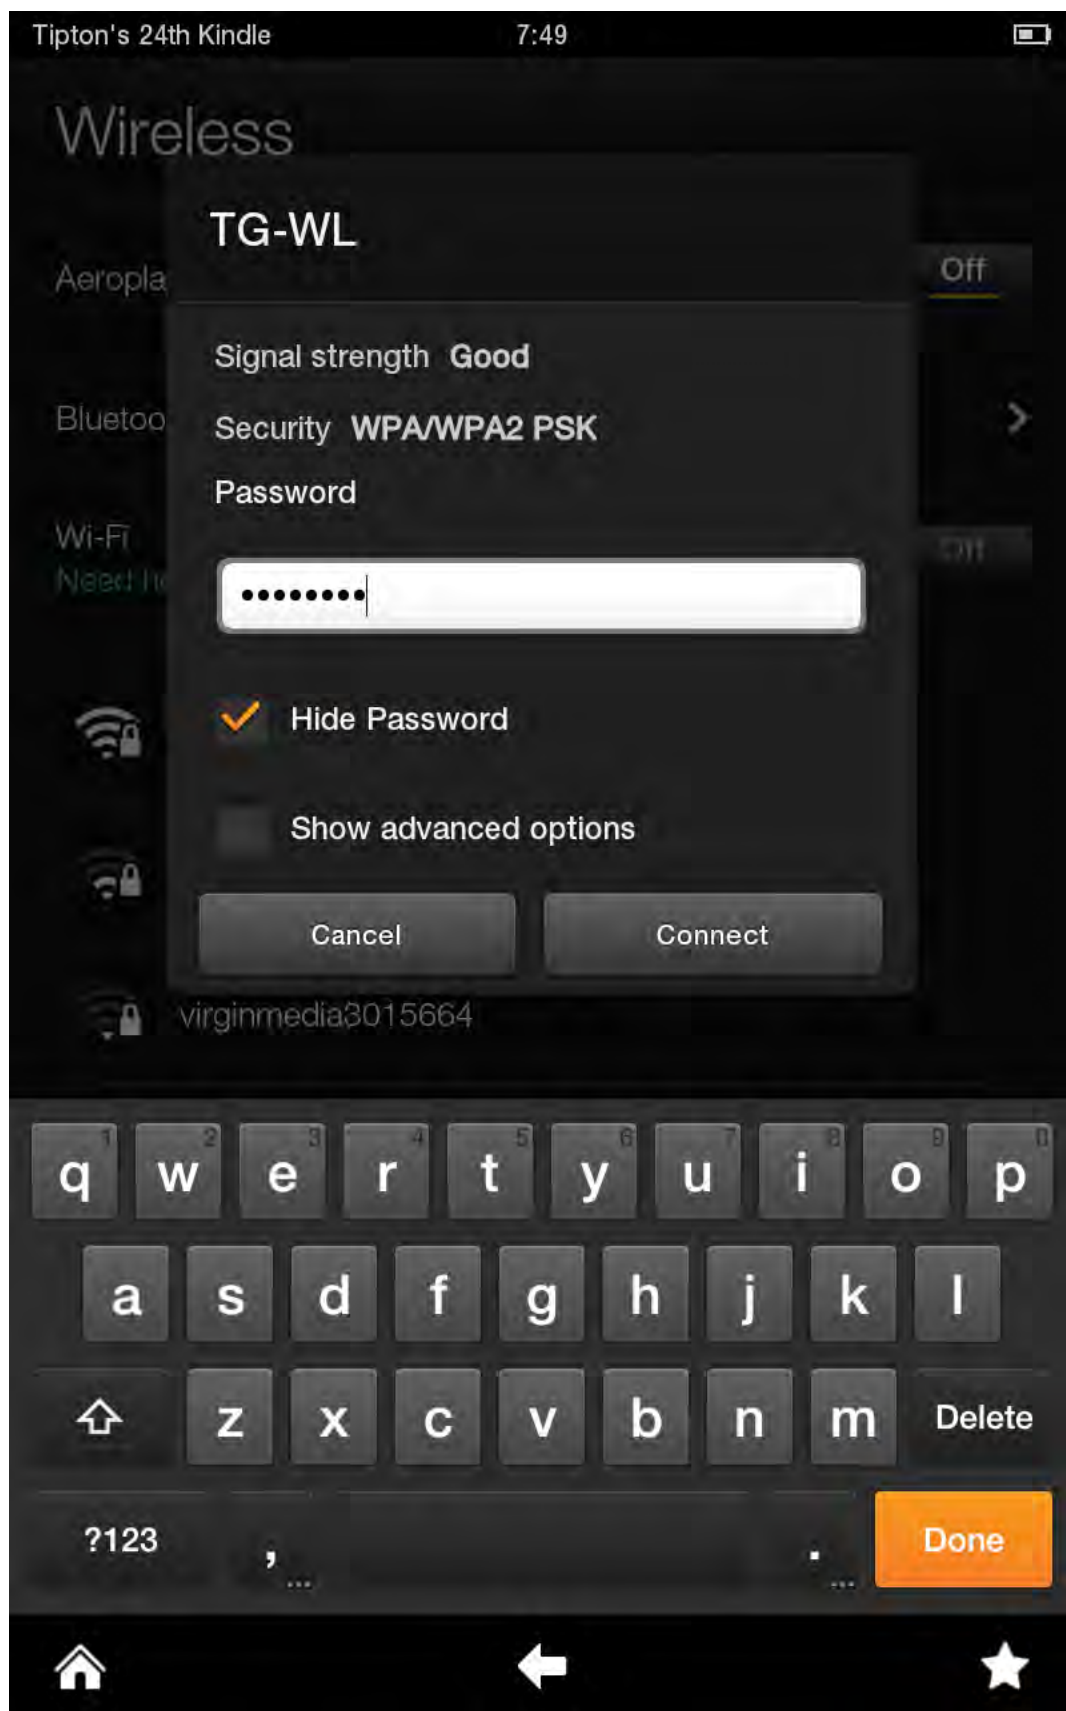

Tap on the wireless icon to connect to wireless. You will see a list of wireless networks. Choose your wireless network from the list. Tap on the wireless network. For example TG-WL.

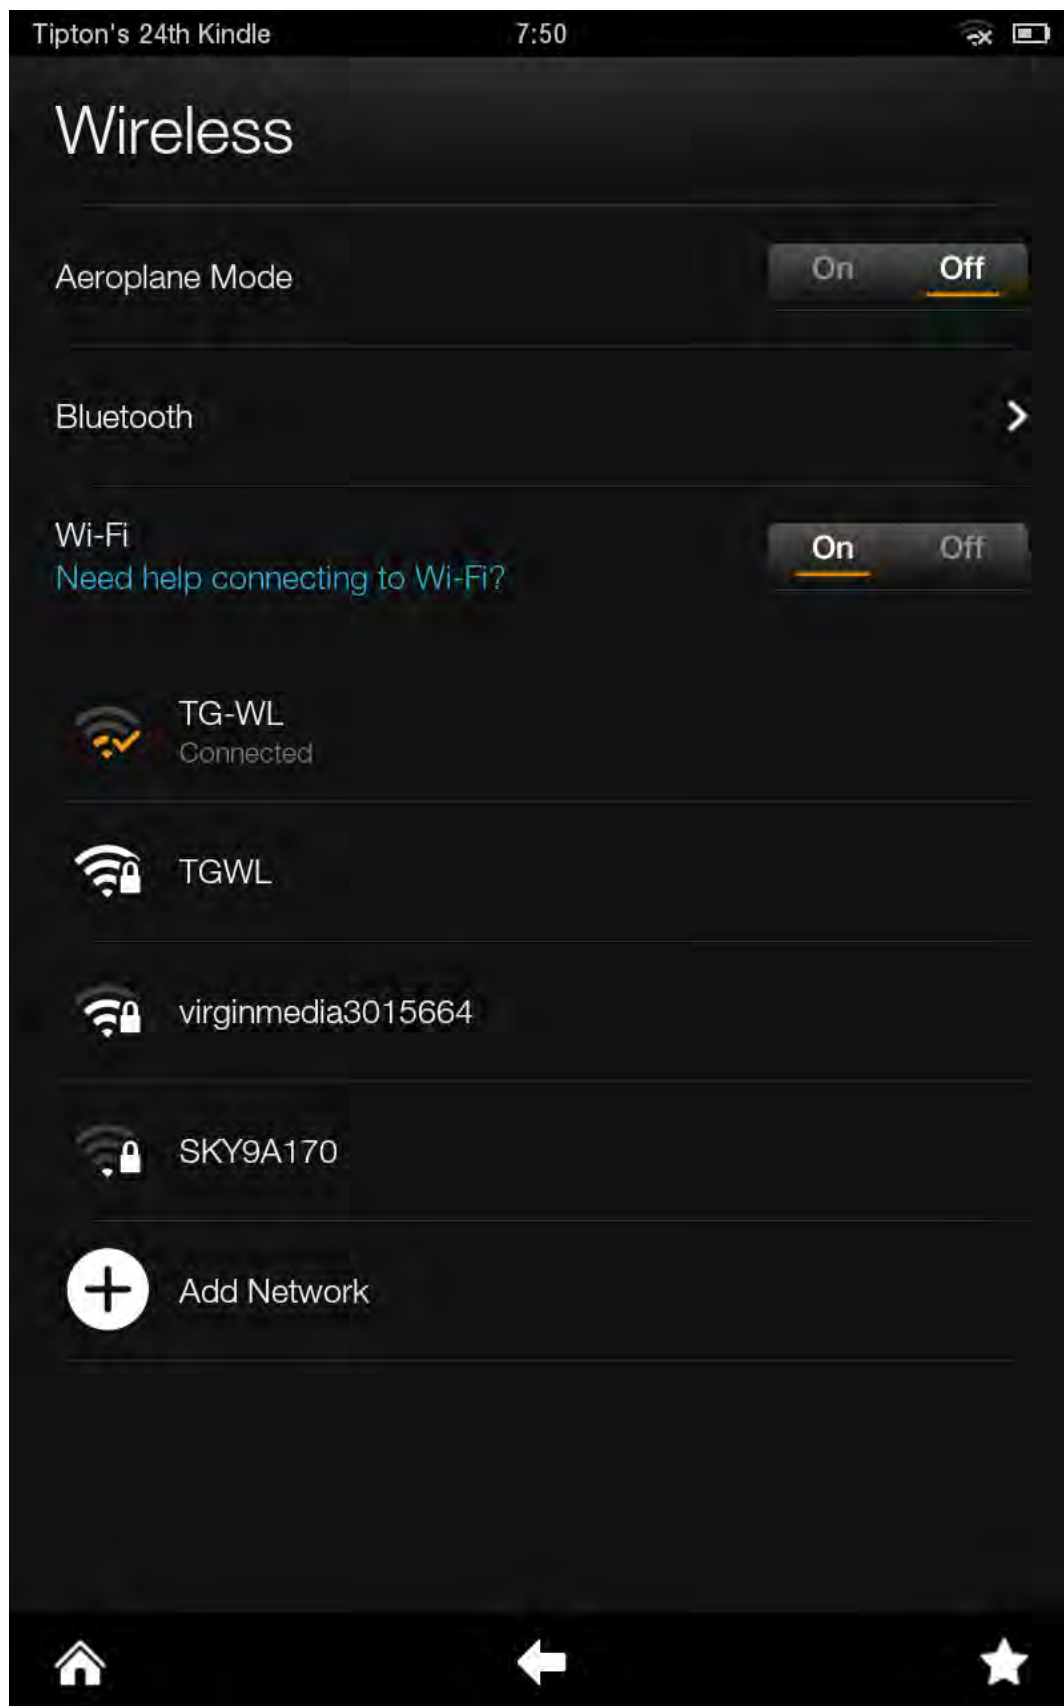

Put the password of the wireless network and tap on connect.

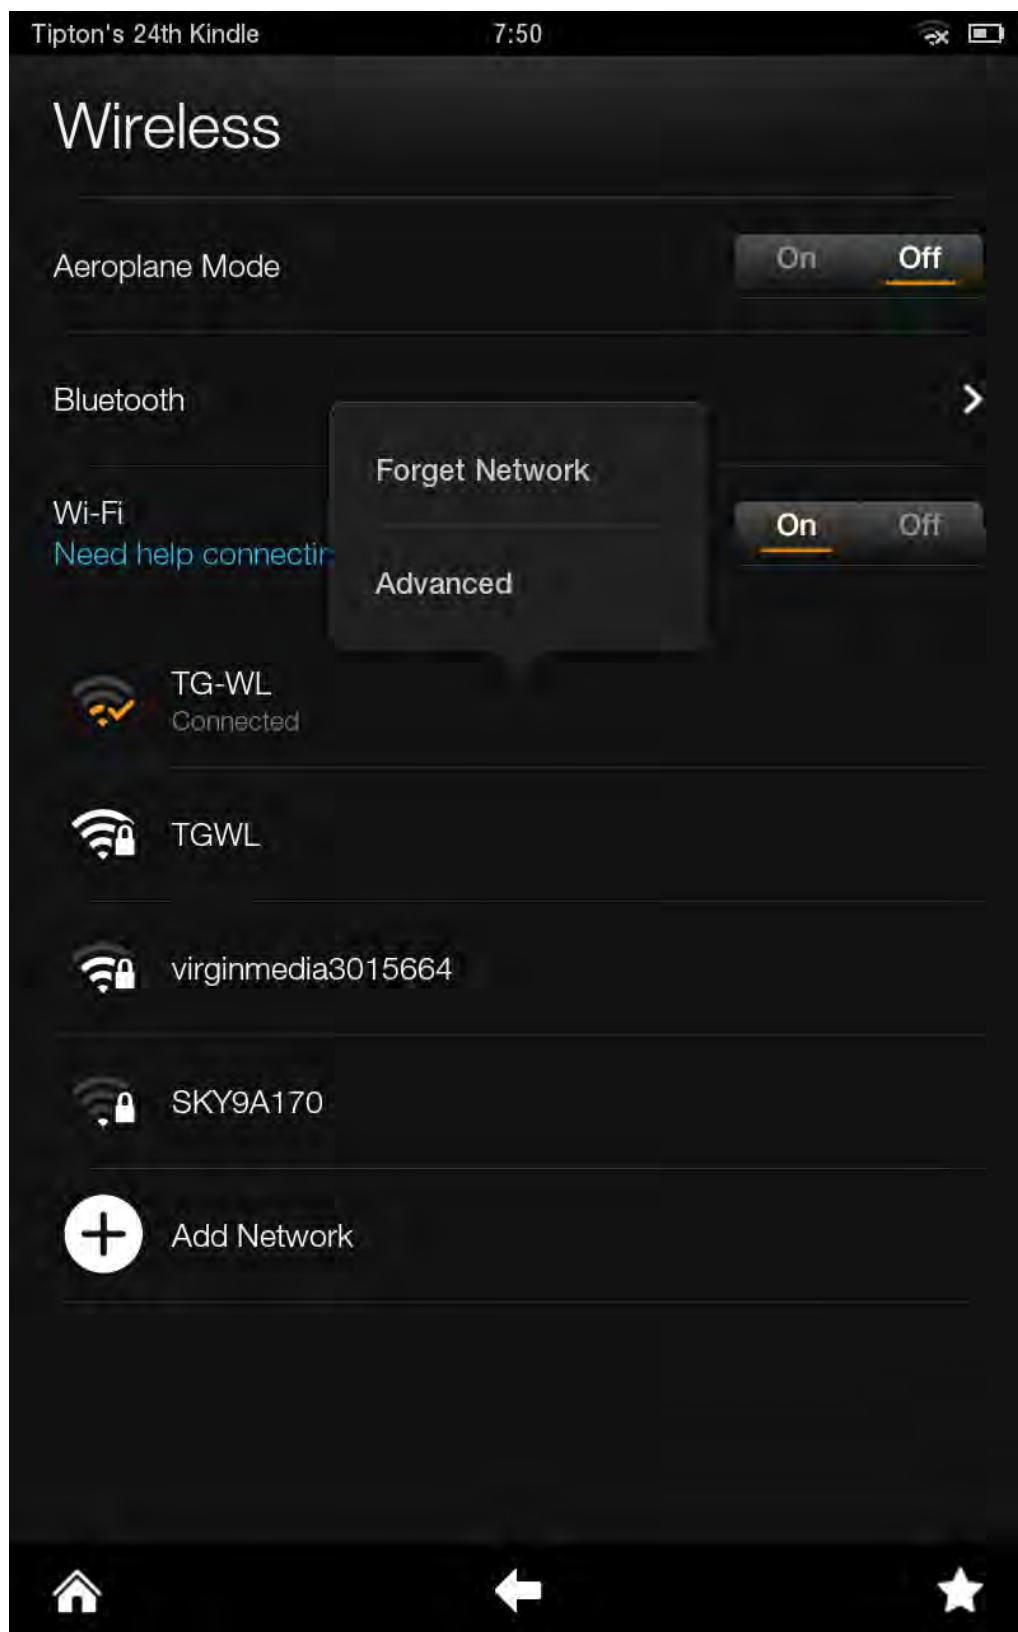

Screen looks like this when you type you password. Tap on connect.

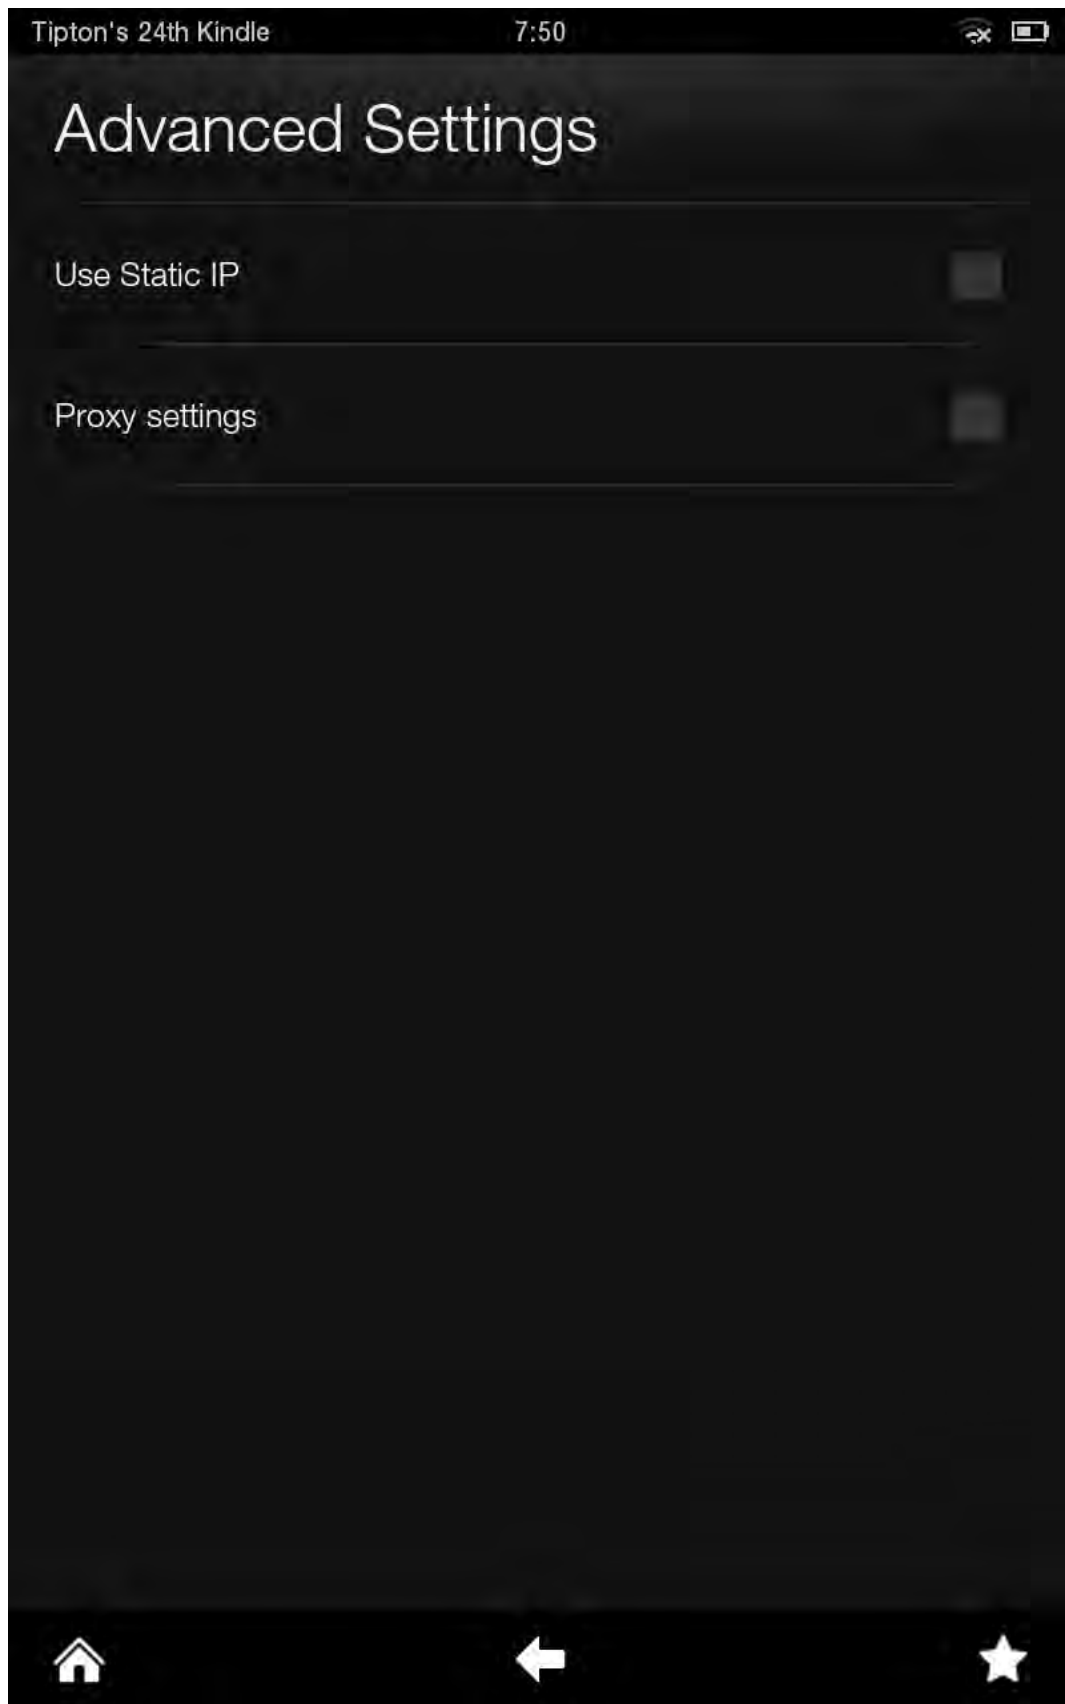

Your Kindle is now connected to wireless network of your choice. You can see the connected is written under TG-WL(example).

Now press and hold on the connected wireless network. In this picture I have pressed and hold on the TG-WL. A pop up will appear. You can see in the picture it says Forget Network and Advanced. Tap on Advanced.

Advanced settings has now appeared. You can see now the proxy settings. Tap on the square box on the right of the proxy settings.

Once you tap on the square box proxy settings can be entered as you can see below. Enter proxy settings.

Done

Enter proxy settings and tap on done.

You will see the screen like below after you tapped on done. Now tap on Home icon at the bottom left hand corner.

And you are ready to use your kindle Fire HD from behind proxy server.
