

Learning with iPad

See how iOS can transform education

Kelway and Apple would like to invite you to a Seminar with Apple Distinguished Educators (ADEs) at the National Space Centre in Leicester on 29th April.

Kelway is an Apple Solution Expert for Education and is committed to providing the best possible solutions and services with Apple technology in schools. We understand the core concerns in the education sector and the benefit of a digital presence in the classroom.

During the day you will hear about the latest iOS solutions for the classroom which can help transform the teaching environment and improve learning outcomes for students. You will partake in a series of workshops with professional Education Trainers so you can see the potential of iPad in education for yourself.

Lunch will be provided on the day and you will also have the opportunity to have a guided tour around the Space Centre.

Please feel free to bring your own iPad to use in the interactive workshops. A number of iPads will be available for those that do not bring their own.

Places are limited, so please register your place now.
