

BYOD Users, Please Remember to Close Your Tabs

Students using their own devices on the (BYODSSID) network are reminded¹ to close any questionable browser tabs before coming into school.

Your device will refresh any tabs you already have open the first time you use the Internet.

Depending on how your device is configured, it may do this anyway to see if a page you already have open has been updated.

Should this happen while in range of the school wireless and your browsing habits are a little more wide-ranging than the school's Acceptable Use Policy requires.....

.....you will enjoy a conversation with Mr Lastname in which he reiterates home/school boundaries and how this could lead to unemployment in a work environment.

¹ Mr Lastname has mentioned this twice in assemblies to our knowledge.
