Advanced Monitoring for Schools

[viz-ee-go]

Noun.

1. A service that moderates text analysis on a device, building a profile of a user and alerting a safeguarding officer once their profile risk becomes critical.

As digital learning becomes more commonplace in the classroom, the need to protect children online has risen to the top of school's agendas. Legislation such as Keeping Children Safe in Education and the Prevent Duty have solidified how high the Government expectations of school safeguarding responsibilities are. Not only must schools ensure they have appropriate filtering in place, but also appropriate monitoring, putting more of an emphasis on human interaction to ensure that vulnerable young people are safeguarded.

Visigo has been designed to provide the most advanced on-device monitoring that is moderated by vast AI technology and human specialists, meaning you can concentrate on providing support and education to children in your care, with peace of mind that should an incident arise, you will be alerted.

24/7/365 human moderation

Visigo is the only solution of its kind that continuously builds a profile of all users, allowing the system to accurately interpret between a one-off event or a consistent pattern of behaviour.

Smart profiling

Now more than ever, schools are looking for support as the demands to protect children increase, and the Visigo solution from Smoothwall helps to support the effective management of safeguarding and gives you comfort knowing you can support people in your care.

Text analysis

Artificial Intelligence

smoothwall
The Web You Want

Key Features:

Smart Profiling

Builds an up to the minute profile of activity per individual, used to assess the context of a situation analysing the risk profile.

Text Analysis

Captures all text input via the keyboard, whether online or offline, allowing you to circumvent encrypted sites or apps.

24/7/365 Human Moderation

Content is reviewed by a team of moderators around the clock to analyse instances and alert safeguarding officers of any high risk incidents.

Multiple Language Support

Able to monitor multiple languages, including those typed in romanised script, slang, colloquialisms, local language, abbreviations, euphemisms and more.

Instant Alerting

Immediate alerts are based upon specific categories you identify as serious incidents, and will be sent to your designated safeguarding lead in a format of your choice.

Image Capture

Screen capture functionality sits within the solution, allowing any online and offline incidents that require investigation to be screen grabbed for later review or evidence.

Artificial Intelligence

Uses machine learning to gather context before escalating for human moderation, improving performance and eliminating false positives.

Auto-updates

You will never need to run updates for the client as it automatically updates in the background.

Zero Impact on Performance

You will not experience any latency or notice the client is running at any time, including when taking screen captures.

Flexible Moderation

Profiles and policies are built based upon your own risk qualification criteria.

Multi-device Support

Available on PC and Mac, including terminal services.

Administrator Portal

View system status, account analytics and performance.
