7300 Access Point Range

ZoneFlex 7343 & 7363

Why Choose Ruckus™ From CP Ltd

Over 200 schools and colleges supplied and installed within the UK and worldwide

Free wireless site survey

Reliable wireless coverage giving broadband to all buildings and facilities

High availability and robust backbone connections through the use of advanced high-gain antenna technology

Low cost, high-gain Wi-Fi receivers and repeaters for extending signals indoors and hard to reach areas

Centralised management of entire wireless and network with Ruckus ZoneDirector giving usage and individual's data

Wire-like wireless reliability

Patented smart antenna array, beamforming and Quality of Service technologies combine to avoid interference and minimize packet loss

Sleek, low profile enclosure

Ease-of-deployment aesthetically-pleasing design fits almost anywhere

Best-in-class mid-range performance at lowest cost

Unprecedented price/performance with extended range at the industry's most affordable price point for both single and dual-band

Extended range requires fewer APs

Dynamic beamforming delivers a 2x to 4x increase in Wi-Fi signal coverage minimizing the number of APs required to service any area

Super simple configuration and management

The industry's simplest configuration and management through a Web-based wizard and automated deployment capabilities

Your one stop IT shop for...

// IT Hardware // Audio Visual Equipment
// Wired & Wireless Telecoms installations and solutions
// Software // Print Consumables // Peripherals

No minimum order value & Free next day delivery
ISC Members receive free WEEE collections
